Q1   In terms of setting design standards for the processing of children's personal data by providers of ISS (online services), how appropriate you consider the above age brackets would be:

   ⊙   Not at all appropriate

   ⊙   Not really appropriate

   ⊙   Quite appropriate

   ⦿   **Very appropriate**

Q1A Please provide any views or evidence you have on how appropriate you consider the above age brackets would be of setting design standards for the processing of children's personal data by providers of ISS (online services).

   We find that 13 year olds are able to take greater responsibility for their digital decisions

Q2   Please provide any views or evidence about children's development needs in an online context for each, or any of the above age brackets.

Q3   Please provide any views or evidence you have on how the Convention might apply in the context of setting design standards for the processing of children's personal data by providers of ISS (online services).

Q4   Please provide any views or evidence you have on what you think the Information Commissioner should take into account when explaining the meaning and coverage of these terms in the Code?

Q5 Please provide any views or evidence you have on the following:

Q5A the opportunities and challenges you think might arise in setting design standards for the processing of children's personal data by providers of ISS (online services), in each or any of the above areas.

We must take into account a teenagers desire to act independently of their parents. Greater clarification is needed around safeguarding and disclosure requirements for providers of digital services

Q5B how the ICO, working with relevant stakeholders, might use the opportunities presented and positively address any challenges you have identified.

Q5C what design standards might be appropriate (ie. where the bar should be set) in each or any of the above areas and for each or any of the proposed age brackets.

Q5D examples of ISS design you consider to be good practice.

Q5E additional areas (not included in the list above) which you think should be the subject of a design standard.

Q6   Name

███████████████████

Q6a   Email

███████@meetwo.co.uk

Q6b   Brief summary of what you think you could offer

We develop apps to help teenagers talk about difficult things. We have good access to young people and regularly canvas their opinions.

Q7   Please provide any other views or evidence you have that you consider to be relevant to this call for evidence.

Q8   Are you (select one):

A body representing the views or interests of children?

A body representing the views or interests of parents?

A child development expert?

A provider of ISS likely to be accessed by children?

Mee Two

A trade association representing ISS providers?

An ICO employee
